
For many years there has been a need for a real history of Idaho. Bancroft's is very good as far as 1889 but is not published as a separate volume and is not down to date, Hailey's is a labored product of an aged and honored pioneer, and McConnell's is impossible. This publication by the Scribner's is a finished book, well arranged as to subjects, reliable as to facts and statistics and readable as to style. It is known to have been written at the request of the Department of Education in Idaho and in the class of school histories it will take a high rank, but is really more than that and will become the reference volume for the people of the state. It is a book of moderate size, has numerous illustrations, and a series of maps which clearly indicate the tortuous growth of the state as to its boundaries. There is a slight lack of balance, there is no bibliography, and the index of only four and a half pages is inadequate. The imprint of the publisher is sufficient evidence of good physical make-up.

Mr. Brosnan, the author, is to be commended for his skill in condensed statements and attractive chapter subdivision and in a chronology and transition which carry along the interest of the reader. Every librarian and historical student in the Pacific Northwest has known that he was writing this book for he has consulted them all and has thus been able to obtain the latest scientific research concerning the earlier periods of the history of Idaho and Old Oregon from which it came.

T. C. Elliott.

The author presents a very interesting personal narrative of her experiences as a pioneer apple-orchardist in the Columbia River country. Weary of the life of a journalist in New York city, she is persuaded by a real estate agent to take up a quarter section of government land in the Far West, and develop it into an orchard. She goes to live on it with a semi-invalid brother, meets many helpful friends, and at the end of the book has lived there six and a half years and gathered her second crop of apples.

Her views of the business and rewards, of apple-orcharding, are perhaps more rosy than actual conditions warrant. She seems to have had more capital, and more good advice and assistance than
most people can count on, and one preparing to follow in her foot-
steps had best take her story with a grain of salt.

Occasionally the pill shows through the sugar coating—that is
to say, in some places the book reads like a real estate agent's advertise-
ment or an apple-grower's text-book—but in general the style of
writing is smooth and easy, pleasant and interesting to read. She has
many bright and entertaining things to say of the varied types of
people resident in the country, their past experiences, their present
successes or failures, and philosophies. A slight love story—perhaps
a little more sugar coating—runs through the whole, concerning a
young man who comes to visit the author, and the young wife of a
crabbed well-borer who disposes of himself conveniently and heroically
by drowning, while rescuing a little Indian boy who had fallen into
the Columbia.

The main interest, however, is the development of the apple-
growing country, and the author has succeeded in giving a pleasant
picture which will doubtless draw the attention of many toward
orcharding.  

_Evelyn May Blodgett._

_The Cruise of the Corwin._  By JOHN MUIR.  (Boston: Houghton
Mifflin Company.  1917.  Pp. 279.)

In a series of letters to the San Francisco Evening Bulletin and
in his private journal kept from day to day, John Muir left a very
complete and extremely valuable record of his experiences and ob-
servations while on board the revenue steamer "Corwin" in the Far
North. In June of 1881, the Jeannette, in command of Lieutenant
George W. DeLong, was crushed in the ice and sank about one hun-
dred and fifty miles north of the New Siberian Islands.

In the spring of 1880, when the Jeannette had been missing for
nearly a year, the Corwin was commissioned, in addition to her regular
duties, to search for traces of the lost vessel and her crew. Again in
1881 she set sail from San Francisco with the same object in view
and it was at this time that John Muir was one of the party. He had
long been eager to study the evidences of glaciation in the Arctic
region and so took advantage of this rare opportunity.

The Corwin touched at many points in the Far North, Wrangell
Land and Herald Island being of particular interest. Mr. Muir's
report is the first and practically the only scientific account of this
part of the Arctic regions. In addition to his geological reports, some
interesting botanical notes are included.

The author showed himself much interested also in the people of
the lands which he visited, and has given us a fascinating account of
