of Iowa's "Chronicles of the World War," edited by Prof. Benjamin F. Shambaugh. Though in two volumes, to preserve the size in the series, the record is continuous, the second volume beginning with Chapter VII. of the narrative. Each volume, however, carries its own index.

As the title infers, this compilation gives President Wilson's whole case. It includes the explanation he gave to the Foreign Relations Committee of the Senate at a conference in the White House in August, 1919, and also the explanation he gave to the people in some thirty-seven public addresses. There is appended such documents as "The Covenant of the League of Nations."

The authors make a good working team for the production of such a book. Mr. James is Professor of Government in the University of Texas and Mr. Martin is Professor of History in Stanford University. The publishers' announcement gives a clear idea of the purpose: "This is the first book which brings within the compass of a single volume an account of the history, government, and economic development of the twenty American republics lying south of the United States."
