

in the case of each party studied to sketch the field from the national point of view first, and we have as a result a very fine brief history of all the third parties since the Civil War in the United States, with the exception of the Prohibition and Socialist parties. The book is, therefore, of considerable value aside from its bearing on Iowa parties.

In working out lines of demarkation, Mr. Haynes has excluded those third parties which seem to have no distinctly western or American background and his book is, therefore, divided into five parts, each one dealing with a distinct movement, viz., the Liberal-Republican, the Farmers, the Greenback, the Populist and the Progressive. No one familiar with these movements will need reminding what an important part Iowa has played in these new parties and the names of Larrabee, Weaver, Dolliver and Cummins at once suggest themselves. The notes and references are extensive and make an excellent bibliography. To say that the work is done under the direction of Editor Shambaugh is synonymous with saying it is exceedingly well done in every respect.
