A Statistical Study of American Cities. By Students of Reed College under the direction of Professor William Fielding Ogburn. (Portland, Oregon: Reed College. 1917. Pp. 41.)

In this social service study eighteen categories were applied to thirty-six American cities. The categories were as follows: Wage rates, cost of living, death rates, infant mortality rates, population married, church membership, child labor, parks, pavement, fire loss, public properties, library books, school attendance, school property, teachers' salaries, pupils to teacher, illiteracy, spoken English.
